

# Environmental Policy Statement

**Environmental Aim:** It is the policy of Hydrosphere UK Ltd to offer environmentally conscious products and to minimise our impact on the environment through sound business practices.

Hydrosphere UK Ltd have an established reputation for quality, design and technical support. Complementing this we aim for greater eco-efficiency in our business practices. We have documented and implemented an environmental management system (EMS) meeting requirements of ISO 14001. Our EMS supports our commitment to continual improvement and protection of the environment.

We recognise the potential impacts on the environment from our activities and strive to ensure we conduct all our operations according to environmental best practice. This ranges from our product selection, ensuring recyclability at end of life and use of energy efficient lighting, through to our daily business operations particularly resource use and waste management.

Through Hydrosphere UK Ltd's environmental management system, we commit to ensuring:

- Compliance with all relevant environmental regulatory and other requirements.
- Sustainable management of waste utilising the principles of the waste management hierarchy ie eliminate, reduce, reuse, recycle.
- Responsible management of resources, including transportation.
- Energy efficiency through product range and business operations.

At Hydrosphere UK Ltd we have set an objective to proactively improve the products and services we provide whilst minimising significant environmental aspects of our activities. We are committed to continual improvement and will work in conjunction with our staff and supply chain to ensure the requirements of this policy are fully implemented.
