HYDROWATCH & HYDRODATA SYSTEM

Revolutionise your marine AtoN monitoring & control capability

The new **HydroWatch** is a cutting-edge monitoring unit that provides real-time data from instrumentation and AtoN assets, enabling users to analyse trends, identify any anomalies and make informed decisions. With this information, users can benefit from improved operational efficiency, reduced downtime and cost savings.

HydroData serves as a cloud-based monitoring portal for the HydroWatch. It offers a centralised platform to easily track and manage marine assets that may be dispersed across multiple locations or set in remote environments.

With its user-friendly HydroData web portal, the HydroWatch unit puts users in total control — enhancing marine asset management and overall business performance.

FEATURES

- Small Size — Fits Easily into Existing Enclosures
- Low Power Consumption
- 2G/4G Connectivity
- Analogue and Digital Data Inputs/Outputs
- RS232/485 Connectivity
- Compatible With Many Existing Sensors and Marine Devices
- NMEA/Modbus Protocol Support
- User-Friendly Web Portal
- Programmable Alarm Warning Messages for Critical Event Notifications
- Variable Reporting Frequency and Costs — Optimising Data Usage and Costs, Whether Users Require Real-Time or Periodic Updates
- UK Manufactured and Backed by Local Support and Expertise

TECHNICAL SPECIFICATIONS

| | |
|----------------------|--|
| IP Rating | IP64 |
| Size & Mounting | 110 mm x 95 mm x 35 mm 4 x M4 bolt |
| Connectivity | 2G, 4G CAT1 LTE EU bands, global on request |
| Operating Voltage | 7-70 VDC |
| Configuration | Remote configuration by cloud portal over 4G |
| Onboard Storage | Up to 3000 buffered sensor readings |
| Current Draw @ 12VDC | 15 minutes = 4 mAh 5 minutes = 5 mAh Live = 75 mAh |
| Report Interval | 30 seconds to 300 minutes |

DEVICE FUNCTIONALITY

| | |
|--------------------|--|
| Voltage Monitoring | 1 x main battery 5 x additional 0-72 VDC |
| Temperature | 1 x onboard 2 x external |
| Sensor Run Time | YES |
| Trigger Wake Up | Voltage on sensor wire |
| Vibration/Tilt | TILT XY XZ YZ, vibration runtime & acceleration |
| Impact Sensor | 1.8 G (customisable) |
| Control | 4 via external relay controller On/off & reset mode 3-second pulse |
